Aim - This joint project aims to improve the quality of life for persons who have suffered a loss of autonomy through age, illness or accident. It is about developing new technologies for handicapped people through social and technological innovation and the user psychological integrity. It standard components to make them communicate, cooperate and interact with patients, in order to propose appropriate and innovative services in terms of autonomy.

Consortium - 6 Partners from England & France, leading to an interdisciplinary project mixing Social and Technical Sciences

Duration - 32 months: 9 November 2012 - 30 June 2015

The COALAS project has been selected in the context of the INTERREG IVA France (Channel) England European cross-border operation programme, which is co-financed by the ERDF.
